

Pedagogy for 21st Century Green Learning Spaces

Partnership of iNet Australia
with University of Melbourne, Department of Architecture, Building & Planning

Pedagogy & New Learning Spaces Learning Walk Workshop 2010 - Primary & Secondary Focus

Tuesday, 17 August 2010, 9:00AM - 12:30PM
Bayview St Campus, Williamstown High School

Campus Principal: Darryn Kruse
Middle Years 7 - 9

See this inspiring, creative new learning space built around a marine context!

Program Overview

This Learning Walk is showcasing the rebuilt Bayview St Campus of Williamstown High School, which highlights sustainability and maximises its close association with the marine environment.

The school has created the kind of purposeful learning spaces that enhance the best 21st Century learning and teaching, supported by current research and practice.

This Learning Walk is a joint project between The University of Melbourne & iNet Australia that emerged out of the 'Talking Spaces' Symposium, where the need for more professional learning for teachers in regard to new learning spaces and new pedagogy was recognised.

Learning Walks offer unique and highly practical professional development opportunities for teachers and leaders

Solutions in this school setting are creative and unique, incorporating the latest features of sustainability and ICT. See especially the Marine Education Centre.

Also participating:

- **Clare Newton, Smart Green Schools Project**
Senior Lecturer, Architecture Department, The University of Melbourne

Website: <http://joomla.willhigh.vic.edu.au>

Program Objectives

This Learning Walk - Pedagogy & Space will be suitable for both primary and secondary leaders and teachers who wish to:

- develop new learning spaces within an existing building or an entirely new building
- explore how these new learning spaces are operating, and investigate issues associated with effective teaching and learning in these new educational environments
